

Todo until 24.05.21:

1. Setup Kotlin Gradle project.
2. Class that defines message types. Think about superclasses.
3. Class that contains all our peers.
4. Send specification.
5. After finishing 1-4 make a call and discuss peer search functionality
(27.05.21)

27.05.21:

- 1.
